Re: Final Data Characterization Report for Phase 2 Soil and Interior Dust Sampling
Operable Unit 01 (OU1): Vicinity Properties – Phase 2 Sampling
Cornell-Dubilier Electronics Superfund Site, South Plainfield, NJ
U.S. Army Corps of Engineers Contract Number W912DQ-11-D-3009, TO 0002

Dear Mr. Maas:

Louis Berger and ARCADIS/Malcolm Pirnie are very pleased to submit this Final version of the above-referenced report. This report addresses all USACE comments received on the Draft version, as well as the agreed-to text in the applicable sections on interior dust. This document also incorporates all validated data for samples collected during the Phase 2 field investigation program from May thru August 2011, including the additional ROW samples that were collected on August 12th and were originally intended to be addressed in an addendum to this report.

The electronic files for the text, figures, and tables have been posted to:

To access the site, click on the link while holding down the 'Ctrl' key (or paste it into your browser if clicking does not work) and login with the username [REDACTED] and the password [REDACTED]. When you get into the site, you will see a folder labeled Final Data Characterization Report. Click on that folder to open it, and then you will see five files:

- the Transmittal Letter;
- the Response to Agency Comments, dated September 9th;
- the Final Data Characterization Report for Phase 2 Text;
- the Final Data Characterization Report for Phase 2 Tables and Figures; and
- the Final Data Characterization Report for Phase 2 Appendices.

Mr. Ken Maas
